Maintenance Process for Treatment Train

CDS Unit-Continuous Deflective Separator

Clean-out should be bi-annually before and after rainy season.

- Pump out water. Water removed to be dumped into manhole before MFS unit.
- Extract sediment and debris.
- Normal disposal.

MFS Unit-Media Filter Separator

Filter changes and clean-out should be performed annually, before each rainy season.

- Confined space entry.
- Remove filter canisters from vault.
- Install new recharged canisters.
